SKILLS

JavaScript, TypeScript

C#, Python, Elixir

React, Redux

React Native

Node.js, ASP.NET

Microservices, RabbitMQ, Redis

MongoDB, Elasticsearch

PostgreSQL, Microsoft SQL

Containerization, Ansible

Linux, Docker

OAuth 2.0, Asterisk VoIP

PROFILE

Fullstack Web Developer since 2013 with expertise in TypeScript, JavaScript, Node.js, and React. Skilled in backend technologies and DevOps, passionate about continuous learning and innovation in tech.

EMPLOYMENT HISTORY

Full Stack Web Developer, Tenderplan

Sep, 2015 - Present   tenderplan.ru

- Transitioned to fullstack development, balancing frontend and backend responsibilities. Involved in the full lifecycle of web application development of multiple SaaS products and CRM system.
- Played a key role in application redesign, utilizing a modern tech stack including TypeScript, React, Redux, Node.js, and MongoDB. This led to enhanced application performance and user experience, as noted by positive feedback from users.
- Developed and integrated critical features like OAuth 2.0 endpoints and optimized backend services using Node.js and Elixir, resulting in improved security, data handling capabilities, and a more streamlined user experience.
- Led a frontend team, managing recruitment, onboarding, and mentoring. Successfully integrated 10+ new hires into the team, ensuring effective team integration.
- Contributed to DevOps initiatives, including infrastructure design and containerization of services. These efforts led to more streamlined deployment processes, reduced errors during releases, and improved overall system stability and scalability.

Web Developer, LMX Solutions

Mar, 2013 - Sep, 2015

- Began career as an intern and junior frontend developer, working on an e-commerce platform.

- Involved in building an online shop from scratch, utilizing ASP.NET and Backbone, adaptable to legacy browsers like IE6.
- Contributed to the development of the company's first internal SaaS product as a junior frontend developer using AngularJS.
- Participated in architecture design discussions and developed microservices and controllers for ASP.NET applications.
- Worked with technologies like Microsoft SQL, RabbitMQ, and Redis, broadening technical expertise.

EDUCATION

Specialist Degree in Information Systems and Technologies (Equivalent to Master's Degree),
Ulyanovsk State Technical University

Sep, 2010 - Jun, 2015   ulstu.ru

- Developed an Electronic Computer-Aided Design (ECAD) application using Qt framework, gaining proficiency in software design and user interface development.

OPENSOURCE PROJECTS

proxy-supervisor

sources

- Developed a tool for robust proxy management, including monitoring, balancing, and replenishing proxies.
- Implemented features for handling HTTP, HTTPS, and tunnel proxies, focusing on high performance and test coverage.
- Employed technologies such as Node.js and various network protocols, contributing to the project's versatility and efficiency.

telechart

sources

- Created a lightweight, dependency-free library for rendering interactive charts using HTML5 Canvas.
- Ensured responsiveness and cross-device compatibility, enhancing the library's usability for web development.
